

# Digital Transformation in Transportation & Logistics

Hands-free in-situ collaboration

**Improve efficiency at every touch-point with the Transportation & Logistics solution for warehousing, fleet management and yard management.**

## Key benefits

### Improve Accuracy Before Problems Crop Up

If you only track order accuracy based on feedback from your customers, you'll never hit your goals. With RealWear technology, you can improve order accuracy with barcode scanning capabilities and real-time visual verification. Pack it right the first time.

### Bridge New Hires and Experts

RealWear solutions operate on a simple principle: Say What You See. On-screen prompts guide your team through prescribed workflows so they can stay focused and complete each job faster.

### Measure Performance for Actionable Next Steps

How do you measure individual worker performance in real-time? With RealWear solutions, you can check each worker's performance against historical averages and take early steps to improve. Catch errors before they happen and empower your team.

# Digital Transformation with RealWear

## Warehousing

### Pick and Pack

Scan barcodes and confirm each new order with a few simple voice commands. With RealWear, now you can pick, pack, and ship orders faster than ever before. Upgrade your warehouse without a rebuild.

### Inventory Management

Make inventory management smooth and seamless. With RealWear, your workers can track every new shipment as it arrives at your facility with simple solutions designed to keep their hands free.

### Cobots/Automation

RealWear solutions complement your existing automation strategies. Your workers can improve order accuracy, increase performance, and even monitor the health of collaborative robots.

## Fleet Management

### Operating and Maintaining

With RealWear solutions, technicians can easily access visual instructions to shorten repair times. Connect your frontline workers with SMEs to streamline maintenance ops and get back on the road.

### Fulfillment Optimization

When your best people are always ready to work on the right vehicles at the right time, that's superior fleet management. RealWear solutions make easy to schedule both routine and unexpected maintenance.

### Supply Chain

Give your workers a holistic view of every vehicle in your fleet. RealWear solutions provide a straight forward way to view documents, tag images, and manage work orders with the power of your voice.

## Yard Management

### Scheduling

No need to track scheduling with pen and paper. With RealWear technologies, workers can easily see who else is on the job site, whose shift is starting soon, and where they need to be to complete each task on their list.

### Safety

Safety always comes first. That's why RealWear solutions are designed to be intuitive and unobtrusive. This is how you enhance situational awareness while improving your overall performance.

### Crane Operator

'Zero accidents' just got easier. RealWear makes it easier for crane operators to manage loads while keeping their hands free to operate controls. View clear instructions without taking their eyes off their work.
